

Stream No. 1 (2 notices) North end Hartney Bay.
Second bay S. E. Cordova

Is 20 feet wide and 8 inches deep.

It splits about 100 feet from high tide line.

Has a fine gravel bottom.

Accessible 1/2 mile or more.

It enters the bay about the middle of head.

Oct. 3, 1926 school of 60 silvers in a deep hole
close to mouth.

Some dead humps.

Probably 1,000 humps spawned here.

Another small stream enters close to the hill on
the north side.

It is 6 feet wide and 6 inches deep,--that is after
heavy rain.

October 3, 1926 about 500 humps spawned.

Total both streams.....1,500 humps and 60 silvers.

Stream No. 2 (1 notice) First bay south of Cordova.

Is 10 feet wide and 3 inches deep.

Has a rough, rock bottom, a little gravel in pools.

Accessible for about 1/2 mile.

No fish or bones in sight. (Oct. 3 '26)

In bay just south of Saddle Point.

Stream No. 3 (2 notices) Fleming Spit.

Is 5 feet wide and 3 inches deep.

And has a fine gravel bottom (Visit Oct. 1 '26)

Is accessible for fish for about 1/4 mile.

About a dozen dead fish here. (Sept. 28 '26) About
100 spawned here.

Stream No. 4 (2 notices) Humpback.

Is 12 feet wide and 6 inches deep.

Has a coarse gravel bottom.

Is accessible for fish about 900 feet above high
tide line.

For most of that distance is about 20 feet wide and
has several deep pools.

There is about 600 feet more stream exposed at
half tide.

Stream No. 4 Cont'd

There is about as much more water discharging from the power-house flume.

There were enough dead fish to justify an estimate of 300 spawning here.

There should have been many more.

(Visit Oct. 26 '27) 4,500 fish spawned here.

Stream No. 5 (2 notices) Cordova Bay

Is 6 feet wide and 3 inches deep.

Has a coarse gravel bottom.

Accessible about 200 feet above high tide line
at half tide 200 feet of stream bed is dry.

Water running under the gravel.

Not more than 200 fish spawned here.

(no visit '27)

Visit Oct. 2, 1926: Escapement about 200.

Stream No. 6 (All 3 under one set markers) Moore's cannery

Is 10 feet wide and 5 inches deep.

Medium coarse gravel bottom.

Accessible 300 feet above high tide line.

Possibly 200 fish spawned here. Oct. 2, 1926.

Only saw 5 or 6 fish bones.

(No visit '27)
